

Notre mission :
Proposer aux entreprises des ressources d'innovation attractives issues de plus de 160 laboratoires et 7200 chercheurs.

This technology relies on an improved radiotherapy planning with toxicity production from multimodal data

Nature de l'offre :

- Improvement of Patient's care: Predictive - Personalized - Participative
- Clinically reliable and feasible technology
- The technology's workflow relies on non-invasive tools which does not heavily increase the treatment workload

Domaines d'application :

- Radiologie : Radiothérapie et Imagerie médicale
